The Augustine Company / ADC

ARCHITECT

Platt Whitelaw Architects Inc.

PROJECT DESCRIPTION

Associated Students kicked off the 2017 Fall Semester by unveiling its new 1,800 square-foot student lounge in the Conrad Prebys Aztec Student Union. The lounge offers students a place to socialize with their peers or collaborate on school projects using one of the several hi-tech workspaces. The comfortable seating and five televisions also give students a chance to de-stress from their busy schedules. This is a LEED Platinum project.

ADDED VALUE

Working closely with the client, the barrie company not only managed the design and construction phases of the project but also managed the coordination of the owner scope items that included a sound dampening design installed on the ceiling, coordination of the AV infrastructure and all of the furniture, fixtures and equipment for the space.

SERVICES PROVIDED

The barrie company worked to achieve consistency between the design and the project's objectives by performing regular technical reviews to ensure the quality, coordination and constructibility of the design as it progressed. Budgets and schedules were established at the outset, updated as needed, and closely monitored throughout the duration of the project.
